★ Languages

Bangla Fluent
English Professionals
Hindi Intermediate

★ Career Objective

I am an inventive Full Stack Java Developer with hands-on experience in modern web technologies, specializing in building scalable and high-performance applications. Passionate about collaborating with designers, developers, and product teams to deliver impactful digital solutions. Always eager to apply strong technical expertise, problem-solving skills, and creative thinking to tackle real-world challenges.

★ Projects

Spring Boot And Angular Project

Title : [Hotel Booking Management System](#)

Description : A web-based platform that streamlines hotel room search, booking, and management. It allows users to view available rooms, make reservations, and receive confirmations, while Admins and Hotel Admins efficiently manage hotels, rooms, and bookings through a user-friendly dashboard. The system ensures real-time availability, prevents overbooking, and includes features like notifications and PDF invoice generation. Implemented with **Angular(frontend)** and **Spring Boot (backend)** to deliver efficient, scalable, and real-time hotel management operations.

Flutter And Spring Boot Project

Title : [Hotel Booking Management System](#)

Description : A role-based hotel management app where Admin, Hotel Admin, and Customers manage bookings efficiently. Each Hotel Admin controls their own hotel and rooms, while the Admin oversees the entire system. Built with **Flutter (frontend)** and **Spring Boot (backend)** for smooth, real-time operation.

Angular Project

Title : [Hotel Booking Management System](#)

Description : A role-based hotel booking application where Customers, Admins, and Hotel Admins handle reservations seamlessly. Each Hotel Admin supervises their own hotel and rooms, while the Admin manages the entire system. Developed with **Angular (frontend)** and **JSON Server (backend)** for real-time updates, smooth functionality, and efficient booking management.
